### SUBCHAPTER I—GENERAL PROVISIONS

#### § 4701. Findings and purposes

##### (a) Findings

The Congress finds that—

(1) the discharge of untreated water in the ballast tanks of vessels and through other means results in unintentional introductions of nonindigenous species to fresh, brackish, and saltwater environments;

(2) when environmental conditions are favorable, nonindigenous species become established, may compete with or prey upon native species of plants, fish, and wildlife, may carry diseases or parasites that affect native species, and may disrupt the aquatic environment and economy of affected nearshore areas;

(3) the zebra mussel was unintentionally introduced into the Great Lakes and has infested—

(A) waters south of the Great Lakes, into a good portion of the Mississippi River drainage;

(B) waters west of the Great Lakes, into the Arkansas River in Oklahoma; and

(C) waters east of the Great Lakes, into the Hudson River and Lake Champlain;

(4) the potential economic disruption to communities affected by the zebra mussel due to its colonization of water pipes, boat hulls and other hard surfaces has been estimated at \$5,000,000,000 by the year 2000, and the potential disruption to the diversity and abundance of native fish and other species by the zebra mussel and ruffe, round goby, and other nonindigenous species could be severe;

(5) the zebra mussel was discovered on Lake Champlain during 1993 and the opportunity ex-

ists to act quickly to establish zebra mussel controls before Lake Champlain is further infested and management costs escalate;

(6) in 1992, the zebra mussel was discovered at the northernmost reaches of the Chesapeake Bay watershed;

(7) the zebra mussel poses an imminent risk of invasion in the main waters of the Chesapeake Bay;

(8) since the Chesapeake Bay is the largest recipient of foreign ballast water on the East Coast, there is a risk of further invasions of other nonindigenous species;

(9) the zebra mussel is only one example of thousands of nonindigenous species that have become established in waters of the United States and may be causing economic and ecological degradation with respect to the natural resources of waters of the United States;

(10) since their introduction in the early 1980's in ballast water discharges, ruffe—

(A) have caused severe declines in populations of other species of fish in Duluth Harbor (in Minnesota and Wisconsin);

(B) have spread to Lake Huron; and

(C) are likely to spread quickly to most other waters in North America if action is not taken promptly to control their spread;

(11) examples of nonindigenous species that, as of October 26, 1996, infest coastal waters of the United States and that have the potential for causing adverse economic and ecological effects include—

(A) the mitten crab (*Eriocheir sinensis*) that has become established on the Pacific Coast;

(B) the green crab (*Carcinus maenas*) that has become established in the coastal waters of the Atlantic Ocean;

(C) the brown mussel (*Perna perna*) that has become established along the Gulf of Mexico; and

(D) certain shellfish pathogens;

(12) many aquatic nuisance vegetation species, such as Eurasian watermilfoil, hydrilla, water hyacinth, and water chestnut, have been introduced to waters of the United States from other parts of the world causing or having a potential to cause adverse environmental, ecological, and economic effects;

(13) if preventive management measures are not taken nationwide to prevent and control unintentionally introduced nonindigenous aquatic species in a timely manner, further introductions and infestations of species that are as destructive as, or more destructive than, the zebra mussel or the ruffe infestations may occur;

(14) once introduced into waters of the United States, aquatic nuisance species are unintentionally transported and introduced into inland lakes and rivers by recreational boaters, commercial barge traffic, and a variety of other pathways; and

(15) resolving the problems associated with aquatic nuisance species will require the participation and cooperation of the Federal Government and State governments, and investment in the development of prevention technologies.

## (b) Purposes

The purposes of this chapter are—

(1) to prevent unintentional introduction and dispersal of nonindigenous species into waters of the United States through ballast water management and other requirements;

(2) to coordinate federally conducted, funded or authorized research, prevention<sup>1</sup> control, information dissemination and other activities regarding the zebra mussel and other aquatic nuisance species;

(3) to develop and carry out environmentally sound control methods to prevent, monitor and control unintentional introductions of nonindigenous species from pathways other than ballast water exchange;

(4) to understand and minimize economic and ecological impacts of nonindigenous aquatic nuisance species that become established, including the zebra mussel; and

(5) to establish a program of research and technology development and assistance to States in the management and removal of zebra mussels.

#### § 4712. National ballast water management information

##### (a) Studies on introduction of aquatic nuisance species by vessels

###### (1) Ballast exchange study

The Task Force, in cooperation with the Secretary, shall conduct a study—

(A) to assess the environmental effects of ballast water exchange on the diversity and abundance of native species in receiving estuarine, marine, and fresh waters of the United States; and

(B) to identify areas within the waters of the United States and the exclusive economic zone, if any, where the exchange of ballast water does not pose a threat of infestation or spread of aquatic nuisance species in the Great Lakes and other waters of the United States.

###### (2) Biological study

The Task Force, in cooperation with the Secretary, shall conduct a study to determine whether aquatic nuisance species threaten the ecological characteristics and economic uses of Lake Champlain and other waters of the United States other than the Great Lakes.

###### (3) Shipping study

The Secretary shall conduct a study to determine the need for controls on vessels entering waters of the United States, other than the Great Lakes, to minimize the risk of unin-

tentional introduction and dispersal of aquatic nuisance species in those waters. The study shall include an examination of—

(A) the degree to which shipping may be a major pathway of transmission of aquatic nuisance species in those waters;

(B) possible alternatives for controlling introduction of those species through shipping; and

(C) the feasibility of implementing regional versus national control measures.

##### (b) Ecological and ballast water discharge surveys

###### (1) Ecological surveys

###### (A) In general

The Task Force, in cooperation with the Secretary, shall conduct ecological surveys of the Chesapeake Bay, San Francisco Bay, and Honolulu Harbor and, as necessary, of other estuaries of national significance and other waters that the Task Force determines—

(i) to be highly susceptible to invasion by aquatic nuisance species resulting from ballast water operations and other operations of vessels; and

(ii) to require further study.

###### (B) Requirements for surveys

In conducting the surveys under this paragraph, the Task Force shall, with respect to each such survey—

(i) examine the attributes and patterns of invasions of aquatic nuisance species; and

(ii) provide an estimate of the effectiveness of ballast water management and other vessel management guidelines issued and regulations promulgated under this subchapter in abating invasions of aquatic nuisance species in the waters that are the subject of the survey.

###### (2) Ballast water discharge surveys

###### (A) In general

The Secretary, in cooperation with the Task Force, shall conduct surveys of ballast water discharge rates and practices in the waters referred to in paragraph (1)(A) on the basis of the criteria under clauses (i) and (ii) of such paragraph.

###### (B) Requirements for surveys

In conducting the surveys under this paragraph, the Secretary shall—

(i) examine the rate of, and trends in, ballast water discharge in the waters that are the subject of the survey; and

(ii) assess the effectiveness of voluntary guidelines issued, and regulations promulgated, under this subchapter in altering ballast water discharge practices to reduce the probability of accidental introductions of aquatic nuisance species.

###### (3) Columbia River

The Secretary, in cooperation with the Task Force and academic institutions in each of the States affected, shall conduct an ecological and ballast water discharge survey of the Columbia River system consistent with the requirements of paragraphs (1) and (2).

**(c) Reports****(1) Ballast exchange**

Not later than 18 months after November 29, 1990, and prior to the effective date of the regulations issued under section 4711(b) of this title (as in effect on the day before December 4, 2018), the Task Force shall submit a report to the Congress that presents the results of the study required under subsection (a)(1) and makes recommendations with respect to such regulations.

**(2) Biological and shipping studies**

Not later than 18 months after November 29, 1990, the Secretary and the Task Force shall each submit to the Congress a report on the results of their respective studies under paragraphs (2) and (3) of subsection (a).

**(d) Negotiations**

The Secretary, working through the International Maritime Organization, is encouraged to enter into negotiations with the governments of foreign countries concerning the planning and implementation of measures aimed at the prevention and control of unintentional introductions of aquatic nuisance species in coastal waters.

**(e) Regional research grants**

#### § 4722. Aquatic nuisance species program

##### (a) In general

The Task Force shall develop and implement a program for waters of the United States to prevent introduction and dispersal of aquatic nuisance species; to monitor, control and study such species; and to disseminate related information.

##### (b) Content

The program developed under subsection (a) shall—

- (1) identify the goals, priorities, and approaches for aquatic nuisance species prevention, monitoring, control, education and research to be conducted or funded by the Federal Government;
- (2) describe the specific prevention, monitoring, control, education and research activities to be conducted by each Task Force member;
- (3) coordinate aquatic nuisance species programs and activities of Task Force members and affected State agencies;
- (4) describe the role of each Task Force member in implementing the elements of the program as set forth in this subchapter;
- (5) include recommendations for funding to implement elements of the program; and
- (6) develop a demonstration program of prevention, monitoring, control, education and research for the zebra mussel, to be implemented in the Great Lakes and any other waters infested, or likely to become infested in the near future, by the zebra mussel.

##### (c) Prevention

##### (1) In general

The Task Force shall establish and implement measures, within the program developed under subsection (a), to minimize the risk of introduction of aquatic nuisance species to waters of the United States, including—

- (A) identification of pathways by which aquatic organisms are introduced to waters of the United States;
- (B) assessment of the risk that an aquatic organism carried by an identified pathway may become an aquatic nuisance species; and
- (C) evaluation of whether measures to prevent introductions of aquatic nuisance spe-

cies are effective and environmentally sound.

## **(2) Implementation**

Whenever the Task Force determines that there is a substantial risk of unintentional introduction of an aquatic nuisance species by an identified pathway and that the adverse consequences of such an introduction are likely to be substantial, the Task Force shall, acting through the appropriate Federal agency, and after an opportunity for public comment, carry out cooperative, environmentally sound efforts with regional, State and local entities to minimize the risk of such an introduction.

## **(d) Monitoring**

The Task Force shall establish and implement monitoring measures, within the program developed under subsection (a), to—

- (1) detect unintentional introductions of aquatic nuisance species;
- (2) determine the dispersal of aquatic nuisance species after introduction; and
- (3) provide for the early detection and prevention of infestations of aquatic nuisance species in unaffected drainage basins.

## **(e) Control**

### **(1) In general**

The Task Force may develop cooperative efforts, within the program established under subsection (a), to control established aquatic nuisance species to minimize the risk of harm to the environment and the public health and welfare. For purposes of this chapter, control efforts include eradication of infestations, reductions of populations, development of means of adapting human activities and public facilities to accommodate infestations, and prevention of the spread of aquatic nuisance species from infested areas. Such control efforts shall be developed in consultation with affected Federal agencies, States, Indian Tribes, local governments, interjurisdictional organizations, and other appropriate entities. Control actions authorized by this section shall be based on the best available scientific information and shall be conducted in an environmentally sound manner.

### **(2) Decisions**

The Task Force or any other affected agency or entity may recommend that the Task Force initiate a control effort. In determining whether a control program is warranted, the Task Force shall evaluate the need for control (including the projected consequences of no control and less than full control); the technical and biological feasibility and cost-effectiveness of alternative control strategies and actions; whether the benefits of control, including costs avoided, exceed the costs of the program; the risk of harm to non-target organisms and ecosystems, public health and welfare; and such other considerations the Task Force determines appropriate. The Task Force shall also determine the nature and extent of control of target aquatic nuisance species that is feasible and desirable.

### **(3) Programs**

If the Task Force determines in accordance with paragraph (2) that control of an aquatic

nuisance species is warranted, the Task Force shall develop a proposed control program to achieve the target level of control. A notice summarizing the proposed action and soliciting comments shall be published in the Federal Register, in major newspapers in the region affected, and in principal trade publications of the industries affected. Within 180 days of proposing a control program, and after consultation with affected governmental and other appropriate entities and taking into consideration other comments received, the Task Force shall complete development of the proposed control program.

## **(f) Research**

### **(1) Priorities**

The Task Force shall, within the program developed under subsection (a), conduct research concerning—

(A) the environmental and economic risks and impacts associated with the introduction of aquatic nuisance species into the waters of the United States;

(B) the principal pathways by which aquatic nuisance species are introduced and dispersed;

(C) possible methods for the prevention, monitoring and control of aquatic nuisance species; and

(D) the assessment of the effectiveness of prevention, monitoring and control methods.

### **(2) Protocol**

Within 90 days of November 29, 1990, the Task Force shall establish and follow a protocol to ensure that research activities carried out under this subchapter do not result in the introduction of aquatic nuisance species to waters of the United States.

### **(3) Grants for research**

The Task Force shall allocate funds authorized under this chapter for competitive research grants to study all aspects of aquatic nuisance species, which shall be administered through the National Sea Grant College Program and the Cooperative Fishery and Wildlife Research Units. Grants shall be conditioned to ensure that any recipient of funds follows the protocol established under paragraph (2) of this subsection.

## **(g) Technical assistance**

The Task Force shall, within the program developed under subsection (a), provide technical assistance to State and local governments and persons to minimize the environmental, public health, and safety risks associated with aquatic nuisance species, including an early warning system for advance notice of possible infestations and appropriate responses.

## **(h) Education**

The Task Force shall, with the program developed under subsection (a), establish and implement educational programs through Sea Grant Marine Advisory Services and any other available resources that it determines to be appropriate to inform the general public, State governments, governments of political subdivisions

of States, and industrial and recreational users of aquatic resources in connection with matters concerning the identification of aquatic nuisance species, and control methods for such species, including the prevention of the further distribution of such species.

**(i) Zebra mussel demonstration program**

**(1) Zebra mussel**

**(A) In general**

(ii) tracking the dispersal of the species and establishment of an early warning system to alert likely areas of future infestations;

(iii) development of control plans in coordination with regional, State and local entities; and

(iv) provision of technical assistance to regional, State and local entities to carry out this section.

**(B) Public facility research and development**

The Assistant Secretary, in consultation with the Task Force, shall develop a program of research, technology development, and demonstration for the environmentally sound control of zebra mussels in and around public facilities. The Assistant Secretary shall collect and make available, through publications and other appropriate means, information pertaining to such control methods.

**(C) Voluntary guidelines**

Not later than 1 year after October 26, 1996, the Task Force shall develop and submit to the Secretary voluntary guidelines for controlling the spread of the zebra mussel and, if appropriate, other aquatic nuisance species through recreational activities, including boating and fishing. Not later than 4 months after the date of such submission, and after providing notice and an opportunity for public comment, the Secretary shall issue voluntary guidelines that are based on the guidelines developed by the Task Force under this subparagraph.

**(B) Report**

Not later than 18 months after October 26, 1996, the Assistant Secretary shall issue a report to the Congress that includes recommendations concerning—

(i) which of the methods that are identified under the study conducted under this paragraph are most promising with respect to preventing and reducing the dispersal of aquatic nuisance species; and

(ii) ways to incorporate those methods into ongoing operations of the United States Army Corps of Engineers that are conducted at the Chicago River Ship and Sanitary Canal.

**(C) Authorization of appropriations**

There are authorized to be appropriated to the Department of the Army such sums as are necessary to carry out the dispersal barrier demonstration project directed by this paragraph.

**(4) Contributions**

To the extent allowable by law, in carrying out the studies under paragraphs (2) and (3), the Administrator of the Environmental Protection Agency and the Secretary of the Army may enter into an agreement with an interested party under which that party provides in kind or monetary contributions for the study.

**(2) Participation of others**

The Task Force shall provide opportunities for affected Federal agencies which are not

part of the Task Force, State and local government agencies, and regional and other entities with the necessary expertise to participate in control programs. If these other agencies or entities have sufficient authority or jurisdiction and expertise and where this will be more efficient or effective, responsibility for implementing all or a portion of a control program may be delegated to such agencies or entities.

### § 4901. Findings

The Congress finds the following:

(1) In addition to habitat loss and local use, the international pet trade in wild-caught exotic birds is contributing to the decline of species in the wild, and the mortality associated with the trade remains unacceptably high.

(2) The United States, as the world's largest importer of exotic birds and as a Party to the Convention, should play a substantial role in finding effective solutions to these problems, including assisting countries of origin in implementing programs of wild bird conservation, and ensuring that the market in the United States for exotic birds does not operate to the detriment of the survival of species in the wild.

(3) Sustainable utilization of exotic birds has the potential to create economic value in them and their habitats, which will contribute to their conservation and promote the maintenance of biological diversity generally.

(4) Utilization of exotic birds that is not sustainable should not be allowed.

(5) Broad international attention has focused on the serious conservation and welfare problems which currently exist in the trade in wild-caught animals, including exotic birds.

(6) Many countries have chosen not to export their wild birds for the pet trade. Their decisions should be respected and their efforts should be supported.

(7) Several countries that allow for the export of their wild birds often lack the means to develop or effectively implement scientifically based management plans, and these countries should be assisted in developing and implementing management plans to enable them to ensure that their wild bird trade is conducted humanely and at sustainable levels.
